Localized games and resolved translation-related issues.

Projects and Programs

2024 Conecta ICS

Developed an internal application to automate IT service requests using Power Apps and Power Automate, streamlining ticket creation and service workflows. Integrated AI to suggest possible solutions for reported issues, improving response time and support efficiency.

2025 Runner

Developed and maintained an internal CRM platform managing over 6,000 service requests, improving workflow automation, tracking, and operational visibility. Also implemented AI solutions for payment invoice data extraction, reducing manual work and improving accuracy.
